HOW TO PROCEED

Establishing an HSA is easy! The first step is to obtain an HSA-eligible health insurance plan with your agent, or contact us if you need to locate an insurance company that offers HSA Health Plans. We network with many of them.

*Heritage Bank's
HSA checking is simple
and convenient.*

We can proceed with the HSA plan documents and account setup once your HSA high deductible health insurance becomes effective and we receive your completed HSA Account Application and application fee. Proximity to the Bank isn't an issue with an HSA, as everything can be conducted conveniently through the mail.

Typically, HSA documents are sent out the same day we receive the application. Once we received your signed account documents back, your checks and HSA debit card (upon request) will arrive in 2-3 weeks. You can contribute to your Heritage HSA on whatever schedule works with your cash flow.⁶ Throughout the year you'll use your debit card or checks to pay qualified medical expenses directly or to reimburse yourself for medical claims paid from your personal account. Keep careful track of your HSA account balance so as not to write checks in excess of the account balance.⁷ As custodian, we are not required to review distributions for eligibility so there's no filing claims with an administrator, no delays in getting your money back. Just keep your medical receipts on file to substantiate your distributions to the IRS.⁸ After year-end, we will send you a summary of your activity for the year, and report your contributions and distributions to the IRS as required. Your tax preparer will need to attach Form 8889 to your tax return as well. It's that simple!

SERVICE YOU CAN BANK ON
